Monviso was inspired in a mountain in the cocio alps in italia close to the border wih france. Monviso is well known for their pyramid form It is taller than all of the picos neighbours eith a diference of 500 meters you can see a very far distane from the meseta piemontese and the langhe. On a clear day you can see the top of the cathedral in Milan

For these reasons it was takem as a inspiration referente, now that monviso will give the experience to be in the tallest part of the city, havin a great view od the city amd the beach: giving a sensation of relaxation and traquility , your style of life and you home will change.
